

TANK MIX	TIMING
Sencor [®] 480 SC (500ml) + Lasso [®] -atrazine (2.5 - 3 litres) to treat one hectare	Apply as a ground spray pre-emergence to weeds and maize.

NB. Apply in a water volume of 200 litres per hectare (2.5 Acres)

Products / Water Ratio

Water Volume (litres)	Sencor [®] 480 SC (ml)	Lasso [®] -atrazine EC (ml)	Area M ²
15	37.5	187.5 - 225	750m ²
20	50	250 - 300	1000m ²
100	250	1250 - 1500	1.25 Acres
200	500	2500 - 3000	2.5 Acres
400	1000	5000 - 6000	5 Acres

1 Litre

5 Litres

- Application combination that opens the door to improved weed control in maize.

Safety Period

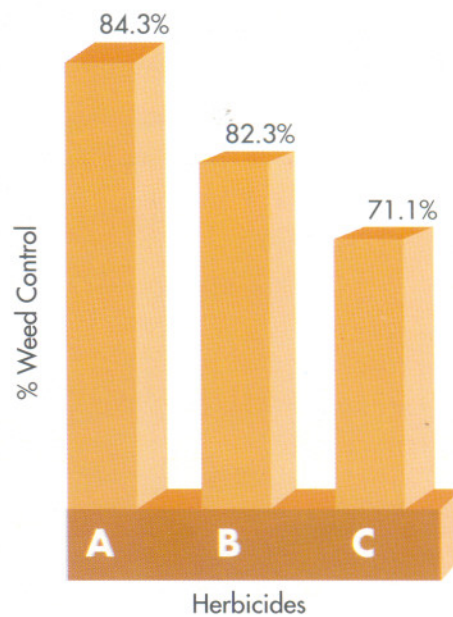

Allow three months from the of spray application before planting crops susceptible to Sencor[®] or Lasso[®]-atrazine such as beans and sunflowers.

Weed Species Controlled

Pigweed (Amaranthus spp.)	c
Blackjack (Bidens pilosa)	c
Charlock (Brasica Kerber)	c
Wandering Jew (Commelina spp.)	c
Water grass (Cyperus rotundus)	p
Thorn apple (Datura spp.)	c
Cough grass (Digitaria spp.)	c
Goose grass (Eleusine spp.)	c
Gallant soldier (Galinsoga spp.)	c
Morning glory (Ipomea spp.)	c
Chinese lantern (Nicandra physalodes)	c
Woodsorrel (Oxalis spp.)	c
Purslane (Portulaca oleracea)	c
Foxtails (Setaria spp)	c
Mexican marigold (Tagetes minuta)	c

Pre-emergency Weed Control in Maize

Weed Control after 60 days
Sencor 480 SC + Lasso[®]-atrazine provide consistent control of grass and broadleaf weed in maize

- A)** Sencor 480 SC +Lasso atrazine
- B)** Standard I 5lts
- C)** Standard II 4lts
