

Dragnet^{FT} TERMITICIDE

DRAGNET FT
Dawa Ya Mchwa
Termiticide

Keeps termites away from your buildings, fences, stored wood and timber. It also controls other destructive pests of wood like Powder Post Beetle.

What is Dragnet FT?

Dragnet FT is a modern formulated insecticide with special long-lasting qualities, soil stability and strong repellancy, suitable for the control of termites.

Dragnet controls both foraging and sub-terranean termites from attacking buildings, lawns, gardens, fences, fruit trees, among others.

Dragnet also controls other wood destroying pests like Ants, Carpenter Bees, Old House Borers and Powder Post Beetles.

MODE OF ACTION

Dragnet is toxic to the target pest. It interferes with the body metabolism hence killing the pest through poisoning.

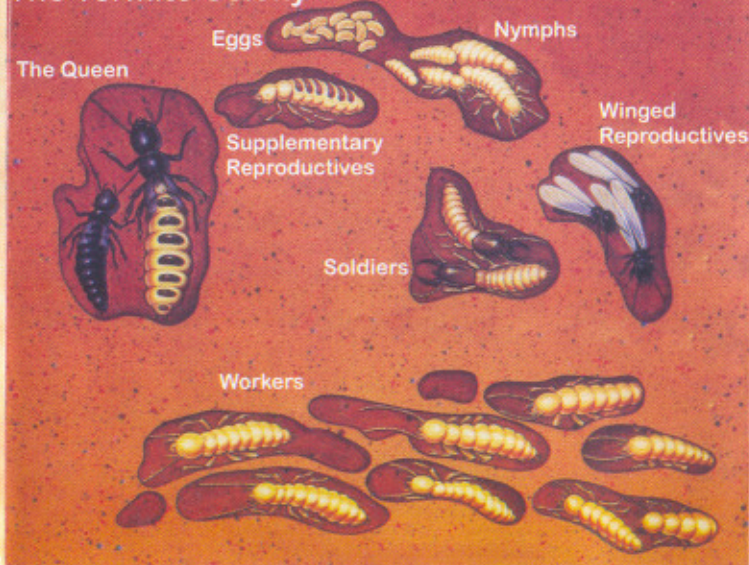

Dragnet more importantly has strong repellent properties. It keeps off the pest from where it is applied ensuring no damage at all. When Dragnet is applied to a construction site, it forms a near-permanent barrier that does not allow termites to come near let alone penetrate thus giving the building desired protection.

Most of the other termiticides in the market lack this property.

A Termite Infestation

The Termite Colony

RATE OF USE

Permanent Buildings
(Sub-terranean Termites)

Mix one litre of Dragnet in 80 litres of water and stir vigorously to blend. Apply the solution all over the building site at the rate of 1 litre per metre square allowing at least one metre overstretch from the demarcated perimeter walls to a depth of approximately 30cm. If the building is existing, create a 1 metre barrier around the perimeter wall.

Temporary Buildings, Fences, and Stored Timber
(Foraging termites)

Mix 1 litre in 250 litres of water (equivalent to 80mls of Dragnet in 20 litres of water) and spray termite-infested areas (walls, garden, fences etc) to wet.

This solution may be used to dip/soak wood, timber, poles etc to prevent attack. Leave the wood in the solution overnight. Alternatively, spray the wood liberally to wet.

PRECAUTIONS

Avoid contact with skin, eyes, nose and mouth.

Wear adequate protective clothing.

Wash hands and exposed skin with water before eating, drinking or smoking after work.

Toxic to fish and bees.

Do not contaminate water supplies, with flushing water or empty containers.

STORAGE AND DISPOSAL

Store in original container only in a cool, dry and well ventilated place.

Do not use or store near heat, open flame or hot surfaces.

Keep out of reach of children and animals.

Do not contaminate other pesticides, fertilizers, water, food or feed by storage or disposal.

Prevent spilled liquid from spreading with the most readily available materials e.g. sand or soil.

Absorbed spilled liquid should later be safely disposed of.

To dispose of containers, triple rinse with detergent or equivalent and offer for recycling, reconditioning or disposal in approved landfill. Consult local disposal authorities for approved alternative procedure.

Vipimo vya dawa na jinsi ya kutumia
Dragnet Ft ni dawa maalum inayofanya kazi kwa muda mrefu inayofaa kwa kuzuia mchwa kwenye majengo, bustani na katika mbao. Pia hukomesha wadudu wanaokula mbao kama vile chungu, mchwa na aina mbali mbali za wadudu wanaotoboa mbao.

Mabamba ya mawe kwenye majengo yanayojengwa

Changanya lita moja ya Dragnet na lita 80 za maji. Tia mseto huu wa dawa katika sehemu ya nje ya msingi wa nyumba kiasi cha dawa cha lita 1 kwa mita 10 mraba. Hakikisha umetia mseto huu wa dawa kwa mita 10 mraba.

Nyumba za Zamani

Tia mseto huu wa Dragnet Ft upande wa nje wa ukuta ukizungukia nyumba kwa upana wa mita moja. Tia dawa kwa kipimo cha lita moja ya mseto wa dawa kwa mita 10 mraba.

Nyumba za sakafu ya udongo, Mlingoti, Nguzo, vyota vya Mchwa

Changanya Lita moja ya Dragnet FT na lita 250 za maji (sawa na milimita 80 za Dragnet Ft Kwa lita 20 za maji) Na unyunyuzie sehemu

zilizoambuliwa na mchwa. Huu mseto waweza kutumiwa kwa kutumbukiza mbao na vkingi kuzizuia kuambukizwa. Unaweza kunyunyizia pia

Uhifadhi na Kutupa

Weka dawa kwenye chombo asili cha dawa. Iweke mahali baridi pakavu penye hewa safi ya kutosha. Usiweke ama kutumia dawa karibu na mahali penye joto, moto unaowaka ama sehemu zenye joto. Iweke mahali wasipofikia watoto na wanyama. Usichanganye dawa hii na dawa zingine za wadudu, mbolea, chakula ua maji kwa kuhifadhi au kutupa.

Usiruhusu dawa iliyomwagika kusambaa kwa kutumia vifaa vinavyopatikana kwa urahisi kama vile mchanga. Dawa ambayo imemwagika na kuingia mchangani baadaye iondolewe kwa njia ya usalama. Ili kumaliza dawa kwenye vyombo vya dawa, visafishe mara kadhaa kwa maji na sabuni kasha pelka chombo kusagwa na kufanyiwa vifaa vingine ama kutupa katika sehemu iliyoidhinishwa kwa kutupwa vyombo hivyo. Tfuta ushauri wa wakuu wanaohusika na utupaji wa vyombo hivyo uelezwe njia nyingine yta kutupa vyombo vya aina hiyo.
