

# FAS/TAC®

## The low dose high control insecticide

CYANAMID

# **FAS/TAC**<sup>®</sup> 10EC

The low dose high control insecticide

**FAS/TAC**<sup>®</sup> 10EC contains 100gms of alpha-cypermethrin in every litre.

**FAS/TAC**<sup>®</sup> is a broad spectrum insecticide that controls many pests:-

- caterpillars (bollworms, army worms, stalk borers, cut worms, etc)
- whiteflies and aphids
- thrips and leafminers
- antestia and scales
- stainers.

**FAS/TAC**<sup>®</sup> means fast action. It controls the above pests very fast.

**FAS/TAC**<sup>®</sup> can be used in virtually all crops:-

- cotton and coffee
- vegetables and fruits
- maize and cereals, etc.

**FAS/TAC**<sup>®</sup> is used in very low doses: 0.8-0.25 lts/ha, 5mls per 20lts (1 knapsack).

**FAS/TAC**<sup>®</sup> is very economical. The low dose makes it one of the most economical insecticides to use.

**FAS/TAC**<sup>®</sup> has a short pre-harvest interval (1 day in French beans).

**FAS/TAC**<sup>®</sup> is safe to the user and environment.

ALWAYS READ LABEL BEFORE USE
